

ОБЪЕДИНЕННЫЙ ИНСТИТУТ ЯДЕРНЫХ ИССЛЕДОВАНИЙ
JOINT INSTITUTE FOR NUCLEAR RESEARCH

Dear Professor Bogomilov,

On behalf of the Directorate and the international team of the Joint Institute for Nuclear Research (JINR), we convey to you and your colleagues our warmest and most sincere congratulations on the 80th anniversary of the Department of Atomic Physics at Sofia University "St. Kliment Ohridski". Your department has come a long way over the eight decades of its existence, becoming a recognized centre of academic excellence and a true talent factory for fundamental science in Bulgaria and around the world.

Our long-term cooperation today encompasses the most leading edges of modern science. We successfully collaborate in the fields of elementary particle physics and high-energy heavy-ion physics, solving complex problems as part of large-scale international experiments. This collaboration allows us not only to obtain unique experimental data but also to jointly expand the boundaries of understanding the fundamental laws of nature.

Our fruitful cooperation in scientific and educational programmes is particularly significant. Our joint efforts to train highly qualified personnel have created a strong bridge between the lecture halls of Sofia and the laboratories of Dubna. Thanks to this system, young talents gain access to a unique research infrastructure, becoming world-class specialists.

A clear confirmation of the quality of your education is the fact that today, the department's graduates constitute a significant portion of all Bulgarian citizens employed at JINR. Your students make a decisive contribution to the implementation of the Institute's key projects, demonstrating exceptional professionalism and scientific courage.

On this festive day, we wish the team of the Department of Atomic Physics inexhaustible inspiration, new groundbreaking discoveries, and talented students. May the accumulated experience and youthful energy continue to serve the prosperity of science. We wish you good health, welfare, and many years of fruitful cooperation for the benefit of our countries and the entire international scientific community!

Yours sincerely,

Director,
Academician of the RAS

G. Trubnikov

BOGOMILOV M.,
ASSOCIATE PROFESSOR,
HEAD OF DEPARTMENT OF ATOMIC PHYSICS,
SOFIA UNIVERSITY "ST. KLIMENT OHRIDSKI"
